

PROFESSIONAL SUMMARY

- PhD-trained life science professional with 5+ years of experience in drug development and cross-functional program management. Strong in ICH GxP (GCP certified) and data analytics using SQL, Python and Power BI
-

WORK EXPERIENCE

2025-current **University of Hertfordshire, Hatfield, UK**

Research Management | Project Coordinator

- Developed a Power BI dashboard for application and award tracking, automating quarterly senior management reporting, reducing manual effort by 50%, while providing insights across a portfolio of £14 million
- Led the end-to-end planning, phasing, and implementation of a portfolio of 20+ strategic projects, utilising CRM tracking tools to deliver 100% of projects on time
- Conducted primary research via survey and stakeholder interviews to assess engagement with post-award services, improving engagement outcomes by 20%

2023-2024 **Empirical Ventures, Bristol, UK**

Venture Capital | Fellow

- Conducted due diligence, market analysis, and business modelling for 5+ health start-ups
- Built networks between start-ups, researchers, investors, and industry to foster deep-tech commercialisation in healthcare
- Supported early-stage healthcare companies in securing £20k grants/investments and forming partnerships

2023 **Department for Business and Trade, London, UK**

International Policy | Analyst

- Delivered data-driven insights on innovation projects, including a £1bn funding programme, informing reallocation of 100k towards high-performing initiatives
 - Authored 3 comparative international market reports analysing automotive innovation trends across 5+ countries, informing UK competitiveness strategy
 - Facilitated workshops (100+ attendees) and led stakeholder meetings to gather qualitative data to support decision-making, and generated 4 actionable recommendations
-

EDUCATION

2020 - 2025

Centre for Doctoral Training in Aerosol Science, UK

PhD Pharmaceutical Sciences | Scientist

- Built and validated a novel pre-clinical LC-MS method for 3 molecules (ICH-M10 aligned under GxP) platform to quantify respiratory PK and biomarkers, improving lung exposure prediction by 30% and reducing assays by 25%
- Led end-to-end data generation and ML-driven analysis across 3 studies, delivering reports and SOPs for the industrial partner
- Managed 4 project students and 3 research partners (CNBio, IMCS US, and Imperial College)

2014 - 2020 **Università di Urbino, Urbino, Italy**

MSc Chemistry 2:1 with thesis: "Chitosan-based nanoparticles for immune activation"

SKILLS

- **Pharmacokinetics and LC-MS Bioanalysis (GxP):** ICH M10 guidelines
 - **Data Analytics:** Excel, SQL, Power BI, Python
 - **Mixed-Methods Research and Communication:** literature review, survey design and analysis, stakeholder interviews, and conference presentations
-

ADDITIONAL INFORMATION

- Languages: Fluent English, Native Italian, basic French, German and Spanish
